

I recently learned of Sinclair Broadcasting's plan to force their network affiliates to show an anti-Kerry "documentary" without commercials which is clearly nothing but partisan propaganda.

It is shame enough that one media company can reach over 25% of American households. It even more shameful and disgusting that this company would blatantly misuse their power to push their agenda using a publicly owned utility; the US airwaves. The most appalling fact is that the FCC will allow this activity to proceed.

Please, stop this abuse now. We can not allow powerful media conglomerates to control the media in the manner that Sinclair is.
